Kotlářská 2, 611 37 Brno, Czech Republic
phone: +420-549491412 fax: +420-541210337
E-mail: archmath@math.muni.cz
Electronic edition: <http://www.emis.de/journals/AM/>

INSTRUCTIONS TO AUTHORS

Archivum Mathematicum welcomes the submission of high quality research papers that are of interest to a substantial numbers of its readers.

The submission of a paper implies the author’s assurance that it has not been published or submitted for publication elsewhere.

Papers to be considered for publication should be sent electronically (in the form of a pdf file) to the Editorial Office. The authors are invited to suggest the Editor(s) to be associated with the manuscript during the submission process.

Manuscripts should contain a short abstract, 2010 Mathematics Subject Classification, key words, and author’s address including the e-mail address. If the title is long, a shortened version should be supplied for the running heads. Joint authors should indicate on the manuscript which of them should receive the proof.

Authors are encouraged to use \TeX typesetting software to prepare their papers. The \LaTeX macro package is especially recommended. Once an article has reached its final form and is accepted for publication, authors will be asked to supply the appropriate electronic file. This should be a single file, with any relevant macros included in the preamble, and named after the article number (as assigned by the Editorial Office, e.g. AM1234.tex). Figures in PostScript form are also welcome, and should be submitted at the same time as the \TeX file for the paper.

One proof is supplied, which should be corrected and returned promptly.

Subscription rate: Czech Republic CZK 240, all other countries USD 120 for a Tomus for Library/Institution, USD 60 for individuals. Subscription inquiries should be sent to the Managing Editor. Back volumes are available, prices will be provided on request.

CONTENTS

B.A. Kpata:	
On a decomposition of non-negative Radon measures	203
F. Abtahi, E. Byabani, A. Rejali:	
Some algebraic and homological properties of Lipschitz algebras and their second duals	211
A.K. Asboei, S.S.S. Amiri:	
Recognizability of finite groups by Suzuki group	225
M. Kalus:	
Non-split almost complex and non-split Riemannian supermanifolds	229
H. Sadeghi:	
Δ -weak character amenability of certain Banach algebras	239
K. Esmeral, O. Ferrer, J. Jalk, B. Lora Castro:	
On hyponormal operators in Krein spaces	249
M. Doupovec, I. Kolář:	
On the γ -equivalence of semiholonomic jets	261
